

Site Financials makes tracking, billing, and budgeting for clinical trials more efficient and accurate.

The average clinical research site operates with less than 90 days of operational cash. Inefficiencies in the budgeting and reimbursement process can lead to delayed payments and/or reduced compensation. That's why Site Financials from OneStudyTeam is designed to empower sites to better manage the financial aspects of clinical trials. With Site Financials, site teams can easily manage budgeting and cost tracking. The result: accurate compensation for current trials and improved forecasting for future trials.

Track *every cost* for every study activity.

Site Financials is linked to your trial protocol already built into StudyTeam for Sites. As soon as you complete a patient visit or other study activity, the cost of that task is accurately and automatically accounted for and invoiced.

Why use Site Financials?

Simple cost management

Site Financials enables better budgeting, forecasting, and cost tracking. It helps to ensure that financial resources are allocated effectively and that your trials stay within budget.

Enhanced forecasting

With a centralized view of study financial data, stakeholders can more accurately anticipate challenges and better forecast for future trials.

Increased efficiency

By automating routine financial tasks, Site Financials frees you up to focus on higher-value activities such as analyzing financial data and making strategic decisions.
